

2<sup>nd</sup> International Summer School 2013 - June, 29-July, 5  
Sardinia, Italy

# OBSILAB

Technology, experimentation and traceology  
of Neolithic obsidian toolkits

This second edition of the Obsilab Summer School is addressed again to PhD, Master and undergraduate students interested to try an integrated approach to the analysis of Neolithic obsidian assemblages from Western Mediterranean combining technology, experimentation and traceology.

## General Programme

June, 29 - Morgongiori: welcome to participants

June, 29-July, 1 - Morgongiori: methods and practice of obsidian assemblage analysis; experimental knapping technology; experimental reproduction of obsidian Neolithic tools.

July, 2-5 - Pau: experimental reproduction of obsidian Neolithic tools; harvest; Neolithic bow shooting; butchery; hide working; drilling pottery, mineral and organic matters; principles, theory and practice of obsidian traceology.

ObsiLab 2013 Summer School is articulated with classes, laboratory workshops and outdoor experimentations in the Monte Arci woods
